

MEDICAL REVITALIZATION, INC

TopCon SL-3D

Features

- The Topcon SL3D slit lamp is a fine instrument with superior illumination and optical quality, combined with a proven design provide a versatile slit lamp to meet the most exacting practitioners' requirements. The crisp slit image is completely rotatable from 0 to 180 degrees. The slit beam in the horizontal position may be inclined or tilted up to 20 while maintaining exact center of rotation distance and focus which is essential for gonioscopy. Standard magnifications for this slit lamp are 10X, 16X, and 25X. Cobalt blue, red free, heat absorbing, and neutral density filters are incorporated. Hruby lens is
